PROFESSIONAL SUMMARY

I am a professional Full-stack Javascript developer with over 4 years of experience working as a freelancer and working with startups. I graduated with a degree in theology but my passion for design and web technologies, which I've had as a hobby since I was 14, has driven me on my self learning path towards becoming a full-stack web developer.

As a Full-stack Javascript developer, I primarily use React, Redux, and SCSS to build intuitive and interactive UI that look good on desktop and mobile. On the backend, I use NodeJS, ExpressJS, and MongoDB to build fast and scalable server side applications. I stay up to date with the latest updates on these technologies and I'm always interested in learning new technologies to improve my skills.

I do all of my development on Ubuntu Linux and my tools of choice are Vim for my text editor, Git for version control, Bash for shell scripting, and Jira for project management.

I also have professional experience as a Graphics Designer working in desktop publishing, creating print materials such as brochures, posters, magazines, and books.

You can visit my portfolio at www.kimnejudne.com where you can see samples of my projects and review the code.

SKILLS

- HTML5
- CSS3
- Javascript
- ReactJS
- Redux
- Gatsby
- NextJS
- SCSS
- Bootstrap
- Material UI
- NodeJS
- MongoDB
- Git
- Bash
- Jira

EMPLOYMENT

Creative Director

Silliman University Divinity School – Documentation Committee

August 2011 – March 2018

As Creative Director, I was in charge of designing the layout of the Church Workers' Convocation Proceedings, promotional materials, and online presence. I worked with a staff of five to six people. Our team had to deliver on tight deadlines and we were always able to deliver. I used Adobe Photoshop, Illustrator, and InDesign to create desktop publishing solutions for the events which the documentation committee catered to.

Freelance Web Developer

June 2016 – March 2019

As a freelance Web Developer, I created web sites and web apps for various clients offering web solutions to business problems. I use React with Redux, Node with Express, MongoDB, Firebase, and other technologies depending on the client's needs.

Frontend Developer

Acudeen Technologies Inc.,

May 2019 – March 2020

As Frontend Developer I was responsible for building and maintaining new features for the Frontend of the Acudeen Technologies Web App using React, Redux, Sass, & Bootstrap among other technologies. I worked with a medium sized team (20 people) to deliver new features quickly and meet the demands of shareholders and users.

About Me

I'm a son, a husband and a father. During my free time I play table tennis, read books on philosophy, or play video games. I also love learning new web technologies and creating cool and fun stuff with them.
